

Connecting iPad to printers

In the tablet App, tap Settings

Tap Printing – it may take a while for the page to display.

- You should see a list of printers connected to your Wifi that you can connect to.
- The list will only display the IP address for the printer. To identify which IP address is which see below...
- The main printer will be your receipt printer
 - Tap on the IP address and make sure it displays in Green
- Repeat this for each kitchen station you are using – Hot, Cold, Expo and Drinks

Which printer

- Turn off the printer
- Hold down the Feed button and turn on the printer.
- A printout will display the IP address for this printer.
- Repeat this for each printer – receipt printer and kitchen printers.
